- ✓ Increased oxygen intake for maximum performance and endurance during competition

More than 5 million teeth are knocked out each year through sports injury, accident, or play. Just as helmets, shoulder pads, and kneepads are worn to protect against sports-related injuries, mouth guards are an equally important piece of protective gear. They can protect against head and neck injuries by cushioning blows that could otherwise cause concussions and jaw fractures.

Sorry, sports guards are not available for Players with orthodontics.
